THE AMAZON RIVER. The Amazon, the largest river in the world, has an area of drainage nearly three times as large as that of all the rivers of Enburgh Review, and several articles written and rope, that empty themselves into the Atlantic. This plain is entirely covered with a dense primeval forest, through which the only paths are those made by the river and its innumerable tributaries. This forest is literally impenetrable. Humboldt remarks that two mission stations might be only a few miles apart, and yet the residents would require a day and a half to visit each other, along the windings of small streams. Even the wild animals get involved in such impenetrable masses of wood, that they (even the jaguar) live for a long time in the trees, a terror to the monkeys whose domain they have invaded. The trees often measure The Still Hour, or communion with God, by from eight to twelve feet in diameter; and the intervals are occupied by shrub-like plants, which here in these tropical regions become aborescent. The origin of the Am-VALUABLE NEW BOOKS.—The Still Hour, azon is unknown; it is navigable for two or Communion with God, by Austin Phelps, thousand miles from the ocean; it is nearly thousand miles from the ocean; it is nearly one hundred miles wide at the mouth, and Thomas, chaptain to the African Squadron in 1855, in some places six hundred feet deep; and
